

Bewege deine Zukunft mit uns.

Wir suchen Dich.

Industrial Plant Project Manager (m/f/d)

Your Responsibilities:

- Management and overall responsibility for multiple installation projects involving automated transport and storage systems in cleanrooms, including ensuring implementation meets deadlines, quality standards, and budget, as well as providing technical and disciplinary leadership to multiple installation teams
- Strategic project planning and resource management, including the coordination of personnel, materials, and equipment
- Close collaboration with junior project managers, site managers, and supervisors in the operational planning, management, and monitoring of customer projects
- Ensuring the highest quality and safety standards, as well as implementing quality control measures and continuous process improvement
- Serving as the central point of contact for clients, management, and executive leadership—from requirements analysis through project management to successful implementation
- Developing and implementing overarching project strategies
- Identifying, assessing, and minimizing project risks, including reporting to management and stakeholders
- Continuously developing the installation staff through training, coaching, and mentoring

Your Profile:

- Completed technical training and/or a technical degree (e.g., mechatronics, electrical engineering, mechanical engineering, etc.)
- Several years of professional experience in project management—ideally in the semiconductor industry
- Proven leadership skills and experience coordinating external project partners
- A structured, solution-oriented, and customer-focused approach to work
- Strong communication and problem-solving skills, as well as a confident and reliable demeanor
- Very good German (C1) and English (B2) language skills
- Proficiency with MS Office
- Intercultural competence and willingness to travel occasionally for work
- Class B driver's license
